SUMMARY

I'm a software developer with a Diploma in IT (Software Development) and hands-on experience across development and software quality assurance. I've worked with C#, ASP.NET, SQL, HTML, CSS, and JavaScript, and I approach development with a strong focus on structure, clarity, and maintainability. My background in testing has shaped how I think about software, from understanding requirements to anticipating edge cases and user behaviour. I've collaborated with cross-functional teams in structured, Agile-style environments and value clear communication and shared ownership. I'm motivated by building practical solutions that work reliably in real-world contexts and improve how users interact with technology.

EXPERIENCE

Inspired Testing | *Software Quality Assurance Tester*   **Mar 2019 – Feb 2020**

- Designed and executed manual and automated test cases across web, desktop, and mobile applications, ensuring alignment with functional requirements and accessibility standards (WCAG).
- Contributed to automated regression testing using tools such as Selenium and HP UFT, supporting continuous integration workflows and improving release confidence.
- Collaborated closely with software developers, business analysts, and stakeholders in Agile teams to clarify requirements, validate features, and resolve defects efficiently.
- Logged, tracked, and reported defects using Jira, providing clear reproduction steps and supporting faster issue resolution.
- Performed cross-browser, cross-device, and exploratory testing to ensure consistent behaviour, usability, and performance across platforms.

Dynamic Visual Technologies | *Automation Tester*   **Jul 2015 – Feb 2019**

- Built and executed automated test scripts for web and desktop applications using Selenium and HP UFT.
- Supported regression testing efforts to maintain application stability after code changes.
- Integrated automated test suites into Jenkins pipelines to support continuous integration and reporting.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, reviews, and retrospectives.
- Collaborated with cross-functional teams to identify risks, troubleshoot issues, and improve test coverage.

SKILLS

- Software Development: C#, ASP.NET, JavaScript, SQL, HTML, CSS, Object-Oriented Programming
- Data & Analysis: Basic Excel (pivot tables, formulas), Tableau, SQL, Python & Jupyter Notebooks
- Testing & QA: Manual testing, automated testing, functional testing, regression testing, exploratory testing, test case design
- Tools & Platforms: Git, GitHub, Jira, Visual Studio

EDUCATION AND TRAINING

IE Rosebank College | *Diploma*

- Information Technology in Software Development

Umuzi

- A structured programme focused on professional readiness, applied technical skills, and collaborative problem-solving through real-world projects and design-led activities..

CERTIFICATIONS

- ISTQB Foundation Level Certified; Accenture Python Bootcamp (2025); Introduction to SQL (DataCamp); Introduction to Python (DataCamp); Generative AI & AI Ethics Fundamentals (DataCamp)
